

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Lifecycle Building Center for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Lifecycle Building Center site at 1116 Murphy Avenue SW in Atlanta. Since the late 1800s, the 3.6-acre cleanup site has been used as a machinery manufacturing facility, metal foundry, and commercial business space. The site's soil is contaminated with arsenic and metals, and groundwater is contaminated with arsenic and cadmium. The building is contaminated with metals and inorganic contaminants. Grant funds also will be used to conduct community involvement activities.
